

Salute!

Addition

Directions:

- 3 players are needed for this game
- Cards are divided evenly between 2 players
- Players salute each other, showing their card to the other player, but not seeing it themselves.
- Captain says the sum and players figure out what cards they are holding.
- The first player to correctly say their card wins both cards and places them in their win pile. If a player incorrectly says his/her card, that player must wait for the other player to guess before making a second guess.
- The player with the most win cards in the end wins the game.
- Disputes are settled by the captain.

Captain says:

Remove all J, Q, K

Joker = 0

Ace = 1

- Salute
- The sum is _____
- The winner is _____
- _____ + _____ = _____
